

ASAD KHAN

Software Developer & Computer Science Engineer

📍 Bihar, India | ✉ email@example.com | 📞 +91 98765 43210 | 💻 github.com/asadkhan | 🔗 linkedin.com/in/asadkhan

PROFESSIONAL SUMMARY

Detail-oriented Computer Science Engineering student with a robust foundation in **Python**, **Java**, and **Web Development**. Hands-on experience building full-stack applications, algorithm implementation, and automated machine learning systems. Skilled in core computer science principles including Data Structures & Algorithms, Automata, and Computer Architecture. Passionate about engineering clean, maintainable software and scalable digital solutions.

TECHNICAL SKILLS

Languages:	Python, Java, C, JavaScript, HTML5, CSS3
Web Frameworks & Tools:	Node.js, Express.js, RESTful APIs, Git, GitHub, VS Code
Core Computer Science:	Data Structures & Algorithms (Linked Lists, Logic, Trees), Object-Oriented Programming (OOP), Automata Theory, Computer Architecture
Database & Tools:	MySQL, SQLite, JSON, Web Development Tools

KEY PROJECTS

AI-Based Resume Screening System

Python

NLP / ML

Web

- Engineered an automated resume screening system to parse candidate CVs and measure relevance against specific job descriptions.
- Implemented text extraction and keyword matching algorithms using Python to compute match percentage scores.
- Designed a clean, intuitive dashboard interface for recruiters to upload candidate documents and view instant screening analysis.

Full-Stack Personal Portfolio Application

JavaScript

HTML/CSS

Node.js

- Designed and developed a fully responsive custom portfolio platform showcasing technical projects, skillset, and contact channels.
- Implemented dynamic frontend component rendering coupled with a Node.js backend to manage interactive user queries.
- Optimized cross-browser rendering speeds and mobile responsiveness following modern CSS design practices.

Data Structures & Algorithms Library in C & Java

C

Java

Algorithms

- Developed modular implementations of fundamental linear and non-linear data structures including complex Linked List manipulations, stacks, and search algorithms.
- Focus on memory optimization, execution time efficiency, and rigorous pointer logic handling in C.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science & Engineering

Relevant Coursework: Automata Theory & Formal Languages, Programming for Problem Solving, Computer Architecture & Organization, Data Structures & Algorithms, Object-Oriented Programming (OOP).

CERTIFICATIONS & COURSEWORK

- Automata & Computation Theory:** Advanced study in formal languages, state machines, and computational logic.
- Programming for Problem Solving:** Comprehensive problem-solving coursework focusing on algorithm optimization in C & Python.

- **Computer Architecture & Systems:** Theoretical and structural knowledge of CPU design, memory hierarchy, and instruction sets.
